The Principal
School of Health Sciences
Moi University

Dear Sir/Madam,

Re: Application for Industrial Attachment — IT, Data Science & Software Development

I am writing to respectfully apply for an industrial attachment opportunity within the School of Health Sciences, Moi University. I am currently pursuing a Diploma in Computer Science at Eldoret Polytechnic (2024–2026), and as part of my academic program, I am required to complete an industrial attachment. I am particularly interested in opportunities related to IT support, data science, health data analysis, software development, or digital systems management.

I have developed strong practical experience through building and deploying real-world technology projects that demonstrate my ability to apply technical knowledge to solve practical challenges. Notably, I developed and deployed **Safaricom Churn Intelligence**, a production-grade machine learning REST API that analyzes customer behavioral data, identifies at-risk customers, and provides actionable retention recommendations. I also built **CreditIntelligence**, a credit risk scoring platform trained on over 307,000 records and deployed as a live web application. These projects reflect my capacity to manage the full technology lifecycle — from data collection, cleaning, and analysis to machine learning, deployment, and documentation.

Through these experiences, I have gained proficiency in Python, SQL, Microsoft Excel, Power BI, database systems, and analytical problem-solving. I am a fast learner, highly adaptable, detail-oriented, and capable of working effectively both independently and collaboratively. I am especially passionate about leveraging technology and data-driven systems to improve operational efficiency and support impactful decision-making, particularly in environments where information systems play a critical role.

I am based in Eldoret, available for a 3–6 month attachment period, and ready to begin immediately. I am confident that an opportunity at Moi University's School of Health Sciences would allow me to both contribute meaningfully and further develop my technical and professional skills within a respected institution.

I would greatly appreciate the opportunity to discuss my application further and am available for an interview at your convenience.

Thank you for your time and consideration.

Yours faithfully,

Benedict Bett
